EARN THIS NUGGET

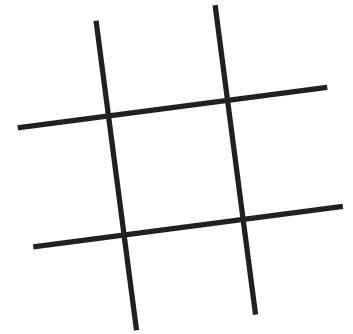

Play at least ten games of Tic Tac Toe. Get extra bragging rights if you can win a couple of them.

LEVEL A

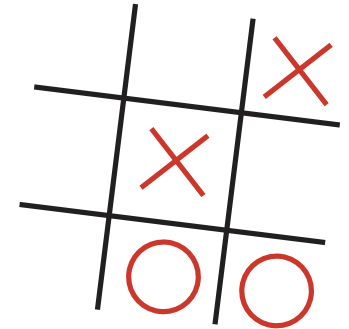

PERIOD 8

TASK 2

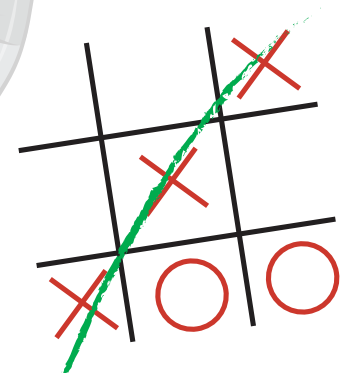

First, you start off with two lines that go straight up and two lines that go straight across, so that makes nine boxes. Can you count them?

One player will be "X's" the other will be "O's." You want to get three of your symbol in a straight row. Now, the first person will be the "X's" and if you want to know the best starting point it's right there in the middle. This will give you the best chance of winning the game.

After you take your first square, then it's the second player's turn. Player two will try to block player one from getting a straight line, while trying to get their own line.

If both players are on their game, you will have lots of rounds that are ties. Take turns being the first player.
